If you are new to PEMF and infrared red light therapy, you may be wondering what it does and how it can help you or your canine athlete. Both are drug-free and non-invasive treatments. PEMF emits pulses of electromagnetic energy, similar to the healthy energy already occurring in the body. PEMF travels

~12-15 inches into the body, oxygenating the blood, refueling the cells and relieving painful swelling, which improves the body's natural ability to heal. The Infrared LZR is a complementary modality which amplifies the effect of the PEMF when stacked together.

Some of the top benefits include:

- Reduction of Inflammation
- Improved Circulation
- Injury Recovery & Wound Healing
- Pain Reduction
- Improved Sleep & Relaxation
- Increased Energy
- And Much More!
